ACKNOWLEDGEMENT

I would like to express my heartfelt gratitude to everyone who contributed to the successful completion of this **System Development Project**.

Firstly, I extend my sincere appreciation to my **GLS University** and the **GLS FCAIT** for providing me with the opportunity and necessary resources to work on this project.

I am extremely grateful to my **guide, Prof. Heta Dasondi**, for their valuable guidance, encouragement, and insightful feedback throughout the development process. Their expertise and continuous support played a crucial role in shaping this project.

I would also like to thank my **team members** for their cooperation, constructive discussions, and teamwork, which greatly contributed to the project's success.

A special note of appreciation to my **family and friends** for their unwavering support and motivation during the entire project duration.

Lastly, I acknowledge all the researchers, and online resources that provided useful references and insights, helping me enhance my understanding and implementation.

This project has been a great learning experience, and I am truly grateful to everyone who played a part in making it a success.

PROJECT PROFILE

Project Title: MONEYEASE

Frontend Technologies: Flutter

Backend Technologies: Flutter, Dart+Python

Project Description:

This app will help onboard new customers and handle common doubts about financial products. The easy UI will help the customer understand their financial goals and give them a brief of what can be visualized in their future. It will create and detail the user profile for the business so that it can be forwarded to the executive person for the final call.

Main objective

- simplify financial services to youth
- Make it easy to onboard new customers

Project Objectives:

The objective of **Money Ease** is to simplify financial services for young individuals by offering an intuitive and efficient platform for onboarding new customers. The application will help users understand their financial goals, resolve common doubts about financial products, and create detailed user profiles that can be forwarded to business executives for further processing.

Project Scope:

User Interface and Experience

Backend Development

Database Management

SYSTEM REQUIREMENTS

Hardware Requirements:

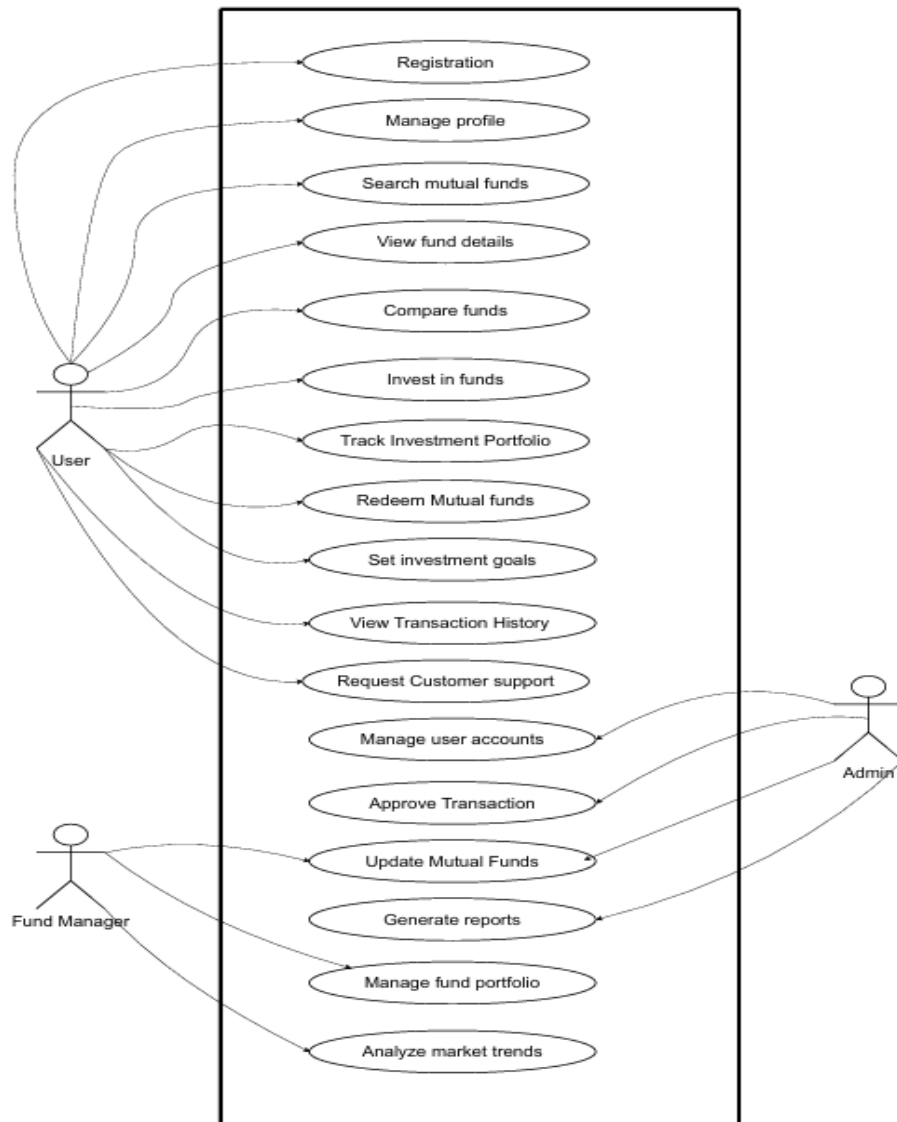

PROCESSOR	Intel Core i5 or higher.
RAM	Minimum 4GB (Recommended: 8GB or higher for smooth performance).
DISPLAY	Minimum resolution 1280 x 720.
INTERNET CONNECTION	Required for Firebase integration and real-time data synchronization.

Software Requirements:

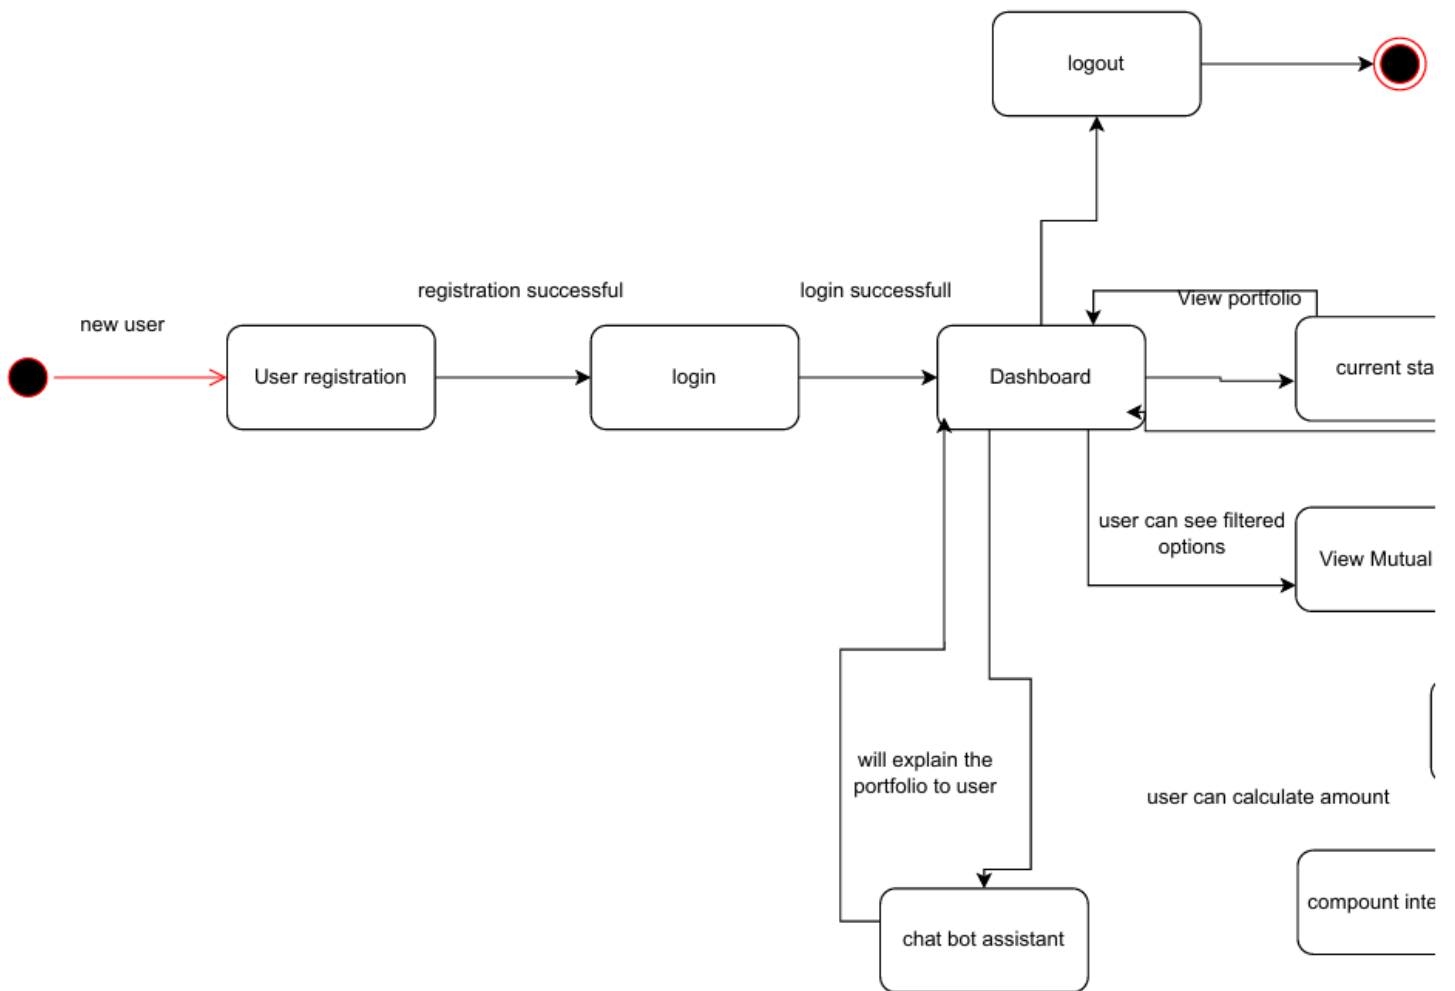

OPERATING SYSTEM	Windows 10/11, macOS, or Linux.
DEVELOPMENT TOOLS	Flutter SDK, Dart SDK, Python
DATABASE & BACKEND	Firebase

CONCLUSION

Working on MoneyEase has been an enriching experience, allowing us to apply our knowledge to real-world problem-solving. We are immensely grateful to Prof. Heta Dasondi for his invaluable guidance and support and to the faculty of GLS FCAIT for their encouragement and insights.

This project is just the beginning, with endless opportunities for improvement and innovation. With further development, MoneyEase can be expanded to offer even more advanced features, making financial management more efficient and accessible.
